

BETTER BEEF

#THEHALTORREWAY

We are a vertically integrated, demand-based operation committed to providing great genetics, good food, and a stress-free environment. Better for the cows, better for the people, better for the planet.

We take this literally.

Your beef is hand delivered right from the farm to your door - even your table, if you'll have us.

We log all health, feeding, and genetic data for each individual cow from birth because tracing is imperative in producing a premium, consistent beef product.

We care about what you eat, so each piece of meat can be **directly traced** back to the source.

Shh.. the secret is in the seaweed.

PREMIUM FEED = PREMIUM BEEF

To care about what you eat is to care about what your food eats. We take care of both.

Our cows are hand-fed a high-end diet that is scientifically proven to **improve** their digestive system, **increase** their birthing yield, and **decrease** their methane output by up to 10%.

HUMANELY & SUSTAINABLY RAISED

We stand by our belief that all animals deserve to be treated with kindness and respect.

We know cows. We know a stress-free environment produces better, tender meat. That is why our cows will **never** have to compete for food - healthier, happier animals and more nutritious beef for you.

300 ACRES OF PEI SOIL OVER 3 PROPERTIES

 *Cherry Valley, PEI*

The soil is composed of brick clay which retains water and helps keep the grass green and healthy. For the cows, this soil is very rich for grazing.
